New York State Growth Measures

## Sample New York State-Provided Growth Data Report for a Teacher

This section of the teacher report provides information about the teacher's overall MGP (that is, across all applicable grades and subjects taught). Note that a growth rating and a growth score are only provided based upon the overall adjusted MGP.

Number of Student Scores: The total number of SGPs included in a teacher's overall MGP.
Percent of Students Above State Median: The percent of students above the State median is the percent of students above the median State growth score in the relevant subject and grade, using the adjusted student SGP. This measure is reported because it is an allowable option for districts to use as a "locally-selected measure."

Unadjusted MGP: Unadjusted MGPs are the mean of the SGPs produced by the State Education Department's (SED) growth model that are based on similar prior achievement scores without taking into consideration ELL status, SWD status, and economic disadvantage student characteristics.

Adjusted MGP: Adjusted MGPs are the mean of the SGPs produced by SED's growth model that are based on similar prior achievement scores and also include consideration of ELL status, SWD status, and economic disadvantage student characteristics.

Lower Limit and Upper Limit: Highest and lowest possible MGP within a 95\% statistical confidence range.

Growth Rating: Based on an overall MGP for a teacher across grades and subjects, the growth rating describes the teacher's performance category (Highly Effective, Effective, Developing, or Ineffective).

Growth Score: Using scoring bands determined by the Commissioner, a growth score of 0-20 points is assigned to each teacher based on his or her overall MGP.

## Sample New York State-Provided Growth Data Report for a Teacher

Students with Disabilities: These are students who are identified based on district-provided information.

English Language Learners: These are students identified as speaking English as a Second Language or who are receiving services through a Bilingual Program or Two-way Bilingual Education Program, based on district-provided information.

Economically Disadvantaged: These are students whose families participate in economic assistance programs such as the Free- or Reduced-price Lunch Programs, Social Security Insurance, Food Stamps, Foster Care, Refugee Assistance, Earned Income Tax Credit, Home Energy Assistance Program, Safety Net Assistance, Bureau of Indian Affairs, or Temporary Assistance for Needy Families, based on district-provided information.

Low-Achieving: These are scores of students who achieved at Performance Level 1 in either Math or ELA on the prior year assessment. A student could achieve Level 1 in ELA but not Math, and vice versa, and therefore the student would only be identified as low-achieving for ELA.

High-Achieving: These are scores of students who achieved at Performance Level 4 in either Math or ELA on the prior year assessment. A student could achieve Level 4 in ELA but not Math, and vice versa, and therefore the student would only be identified as high-achieving for ELA.
