

Lab Skills and Safety

Peggy Muller

EclipseCrossword.com

Across

- 4. used to measure temperature
- 7. amount of matter in an object
- 8. fourth step of the scientific method
- 14. metric unit for volume
- 15. testable prediction
- 16. this type of observation involves measuring or counting
- 17. this type of observation describes things like color, taste, and smell
- 18. worn to protect eyes

Lab Skills and Safety

Peggy Muller

Across

25. an explanation for an observation
27. anything that has mass and takes up space
28. this type of variable is always graphed on the X-axis
30. metric prefix meaning 1/100
31. temperature scale used in science
33. this type of variable is always graphed on the Y-axis
34. this type of line is flat from side to side
36. used to heat objects (2 words)
38. this type of relationship shows a repeating pattern in the data

Down

1. gives accurate measurement of liquids (2 words)
2. the amount of matter in a given amount of space
3. metric unit for length
5. first step of the scientific method
6. in this type of relationship, as one variable increases the other variable decreases
9. amount of space an object takes up
10. used to find mass
11. metric unit for mass
12. last step of the scientific method
13. this type of line goes straight up and down
19. used to get liquids/powders into containers with small openings
20. used to seal test tubes and flasks (2 words)
21. the "dip" in a graduated cylinder
22. the density of this substance is 1 gram/milliliter
23. in this type of relationship, as one variable increases the other variable increases
24. used to move/hold hot objects
26. used to hold liquids
27. metric prefix meaning 1/1,000
29. a description of something you notice with your senses
32. tool used to measure length in metric system (2 words)
35. if volume is held constant but mass increases, density will do this
37. metric prefix meaning 1,000
