

Geometry Midterm Exam Review

Your Geometry Midterm is scheduled for regular class time. You will need to **bring a calculator, pencils, compass, and erasers**. Your pouch will be available, and you will have the full hour to complete the exam.

The exam date is **Thursday 1/12 or Friday 1/13** ** If there is a snow day, the exam will be the following day.

We have covered the following chapters in our HOLT textbook:

- **Chapter 1:** Foundations for Geometry
- **Chapter 2:** Geometric Reasoning
- **Chapter 3:** Parallel & Perpendicular Lines
- **Chapter 4:** Triangle Congruence
- **Chapter 5:** Properties & Attributes of Triangles

Good Study Strategies:

- Pull together **Lesson Summaries**, quizzes, CR's, and tests of each unit. Get correct answers with help if needed; use the lesson summaries model in the binder to correct yours – they are graded on completion and thoroughness.
- Practice all problems from quizzes, CR's, and tests.
- Make flash cards of formulas required to know to learn them.
- Be an active participating student in class and stay for extra help if needed.
- **To review/practice Constructions:**
 - use regentsprep.org website or google the construction (youtubevideos)
 - onlinemathlearning.com/geometry-constructions
- **Use the following websites for help as well:**
 - Regents prep.org/Geometry
 - Khanacademy.com
 - mathisfun.com

Midterm Review Schedule

Day	Topic	Assignment	Questions from Assignments???
Review Day 1	Units 1 , 2 & 3	Complete Packet	
Review Day 2	Unit 4, 5	Complete Packet
